

**1-ALWAYS CONNECT THE HEAD-UNIT CABLE ADAPTER 1st before ignition is turned on!**

Check to ensure that the USC 16 pin connector is wired as above

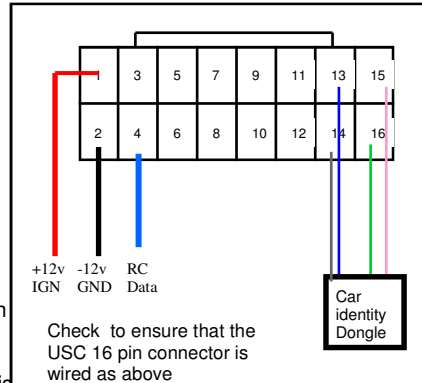

attach blue to Blue/ Brown in car

1. Choose a head-unit adapter from the list overleaf and connect it to the USC black box.
2. Turn off the ignition supply to the car!
3. Remove the OEM head-unit, identify the audio connectors and ensure they mate correctly with the connector supplied with the 29 series cable.
4. Connect between the car and to the ISO connectors on the new radio.
5. Identify the yellow 6 way connector. Attach the Blue wire to the Blue/Brown wire on pin 2 of this connector.
6. CHECK that the red wire is 12V IGNITION switch then turn on ignition
7. Test unit before fully fitting radio and trims back.

**If Problems:** Check that correct adapter has been used and links are in the correct place. Always disconnect from the power supply if you change the head-unit adapter lead. Check that Red wire is 12V ignition and not Permanent power. Check that head-unit is earthed and black wire is earth. Check all connections are the same as the wiring diagram shown here
