

ACTIVE 2 CHARGING CRADLE FOR BLUETOOTH MOBILES

**Blackberry
8100**

Charging Cradle

Unlike the System 9 this cradle is not "Hard-Wired" and therefore is just plugged into the car cigarette lighter socket.

The cradle is mobile specific and comes in all major makes and models.

SYSTEM 9 BASE PLATE Hard-wired Charging Unit for Bluetooth systems

Base plate for active Cradle

System 9 Base Plate

The System 9 Base Plate is a "Hard-Wired" charging unit, which needs an interchangeable cradle for each specific mobile.

The interchangeable cradles gives you the option to easily fit an upgraded mobile, should you change the mobile in the future.

PARROT

Using Bluetooth Parrot Hands-Free Kits, make calls in complete safety with voice recognition software.

The cars speakers accurately reproduce the caller's voice, cutting out road noise and any background noise.

SYSTEM 8 UNI TAKE & TALK

BLACKBERRY
Take & Talk Cradle

UNI CARTALK

System 8 is a fixed "Hard-Wired" unit that is totally hands-free with charger.

The key to the universal UNI System 8 is the Take & Talk cradle. The Take & Talk cradles can be installed for the UNI System 8 without either wires or tools.
